

Am Yisrael Chai

We believe that young Jewish adults are not just our present; they are the architects of our future.

Since October 7, the next generation of Jewish leaders is being tested in ways American Jews have not been tested in generations.

Therefore we invest in programming, educational opportunities, community building, Israel-related activities, mentorship and more to ensure that Jewish college students and young professionals have the knowledge, passion and resilience to be our tomorrow.

We seek to:

- 1. Foster and amplify pride in Israel and Zionism:**
We must remain steadfast in advocating Israel as our historical homeland, the focal point of our religious practice, and a unifier for the Jewish People.
- 2. Instill and spread Jewish pride:**
We must uncover the spark of connection within each Jew that can be kindled because once kindled that pride is contagious.
- 3. Educate and instill a love of Torah and Judaism:**
We must provide knowledge to empower because once you are given the gift of knowledge it can be used to forge a love of our shared Jewish heritage.
- 4. Combat antisemitism and anti-zionism on college campuses:**
We must take on the delegitimization, demonization, and double standards being applied to Jews and to Israel on the college campuses and the fallacy that one cannot be both progressive and pro-Israel.
- 5. Educate about Jewish history:**
We must become a self-aware people who know where we come from and that together we utilize our age-old values, teachings and experiences to improve the world.
- 6. Be a strong voice for Israel in the diaspora:**
We must create a strong counterweight to the college and post-college age voices that seek to vilify Israel and the Jewish People.
