המחלקה למאבק באנטישמיות ולחוסן הקהילות בתפוצות | Department for Combating Antisemitism and Community Resilience

The World Zionist Organization Department for Combatting Antisemitism and Enhancing Resilience works to monitor and eradicate antisemitic events and to strengthen community resilience in the diaspora.

As part of our effort to inform Israeli youth about manifestations of antisemitism today, we created the following educational video series for Israeli students depicting various scenarios in which antisemitism takes place. This is an effort that may be replicated in other languages for students around the world.

Please view the series
